

### PennHIP Report

Referring Veterinarian: Dr Cassi Pettyjohn	Clinic Name: Stone Ridge Veterinary Medical Center of Conroe
Email: info@conroevets.com	Clinic Address: 2555 S. Loop 336 West Conroe, TX 77304
	Phone: (936) 521-1789
	Fax: (936) 521-1634

### Patient Information

Client: Lund, Sheena	Tattoo Num:
Patient Name: "Fancy" 7-Lreba'slittlemisssfancy	Patient ID: 156641
Reg. Name: 7-Lreba'slittlemisssfancy	Registration Num: SS11688601
PennHIP Num: 150865	Microchip Num: 982126052805854
Species: Canine	Breed: GOLDEN RETRIEVER
Date of Birth: 13 Mar 2019	Age: 21 months
Sex: Female	Weight: 43.1 lbs/19.5 kgs
Date of Study: 22 Dec 2020	Date Submitted: 22 Dec 2020
Date of Report: 23 Dec 2020	

### Findings

Distraction Index (DI): Right DI = 0.72, Left DI = 0.69.  
 Osteoarthritis (OA): Radiographic evidence of **MILD OA** on the right hip, evidence of **MILD OA** on the left hip.  
 Cavitation/Other Findings: No cavitation present.

### Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.72.  
 OA Risk Category: The DI is greater than or equal to 0.70. This patient is at high risk for hip OA.  
 Distraction Index Chart:

**BREED STATISTICS:** This interpretation is based on a cross-section of 21663 canine patients of the GOLDEN RETRIEVER breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.32 - 0.80) for the breed. The breed average DI is 0.53 (solid square). The patient DI is the solid circle (0.72).

**SUMMARY:** The degree of laxity (DI = 0.72) falls within the central 90% range of DIs for the breed. This amount of hip laxity places the hip at a high risk to develop hip OA. Radiographic evidence for OA was found on one or both hips (see

findings) confirming the diagnosis of Hip Dysplasia. Radiographic evidence of MILD OA on the right hip, evidence of MILD OA on the left hip.
